505125 DEERFIELD RIVER AT SEARSBURG DEVELOPMENT, SEARSBURG VT

PUBLISHED ON DEC 26, 2018 AT 11:04:16 - EXPIRES DEC 26 MIDNIGHT

For the Deerfield River at Great River Hydro's Searsburg Development, Searsburg VT:

The total spill below the dam is 125 CFS

Similar conditions are expected to continue through MIDNIGHT Mon DEC 31

For the river below the project where the spill and the powerhouse flow combine:

At 10:55 AM today 217 CFS

The following forecast for combined flows is based on the most current load forecast from the New England Independent System Operator which schedules and dispatches generation throughout the region:

Until MIDNIGHT today, Wed, 325 CFS

Flows will often differ from this forecast for reasons beyond the company's control including regional energy demand and clearing price, system operating conditions, equipment failures and weather.

All published flows are approximate and forecasts are estimated based upon anticipated energy demand and costs in addition to weather conditions. Actual flows will vary and can change quickly at any time. Stay alert and wear an approved flotation device. Never go in or near the water until you know and accept the risks you are assuming by entering this area!
