

PUBLIC NOTICE SALMON RIVER

Due to lower than normal reservoir water levels, Brookfield Renewable, in coordination with New York State DEC has announced the water base flow on the Salmon River will be reduced starting Thursday, September 29th at 7:00AM. The base flow will be decreased from 335 cfs to 185 cfs.

The decision to lower water flows is to assist in the recovery of the reservoir to sustain base flow.

We will continue to maintain the lower base flows until water conditions improve.

Always check water conditions before you recreate. One source is www.h2oline.com.

If there are any questions, please do not hesitate to contact us at Inquiries.NewYork@brookfieldrenewable.com or 518-615-9357.

Please use caution and wear a personal flotation device when recreating on or near water. Pay close attention to your surroundings and respect all signage, sirens and barriers.
